Profile:

Software Developer specializing in frontend and cross-platform development, with strong expertise in React, Next.js, TypeScript, and Flutter. Passionate about building modern, high-performance digital products that deliver seamless user experiences.

Experienced in developing responsive interfaces and scalable applications, with the ability to translate complex requirements into clean, maintainable, and production-ready solutions. A proactive problem solver and collaborative team player, focused on delivering impactful results.

Portfolio: <https://ghadamohamed.com/>

Internships:

Intensive Training Program (ITP)

October 2025 – May 2026

Frontend & Cross platform track.

Information Technology Institute (ITI), Damietta Branch

Flutter project:

E-Commerce Store App |Flutter |Final Project

[GitHub](#)

- Built with Flutter using Bloc/Cubit for state management, featuring product browsing, cart management, and clean, responsive UI integrated with REST APIs.

E-Commerce Store App

[GitHub](#)

- built with Flutter using Bloc/Cubit for state management, featuring product browsing, cart management, and clean, responsive UI integrated with REST APIs.

News App

[GitHub](#)

- Built with Bloc/Cubit for state management. Integrated REST APIs and implemented search functionality with clean UX and error handling.

Firebase Student Mange App

[GitHub](#)

- CRUD application using Firebase (Fire Store-Authentication) for real-time data Management.

E-Commerce Store UI App

[GitHub](#)

- Responsive E-commerce Flutter UI with clean architecture and reusable components (Product listing, Categories, Product details, Cart, Checkout screens).

Web project:

Harary

[Link](#)

- A comprehensive platform connecting clients with service providers (craftsmen/artisans). The application facilitates service requests (both direct and instant), real-time order tracking, secure payments, and community interactions. The platform is managed through a robust admin dashboard.

Online Store

[GitHub](#)

- A modern e-commerce platform built with Next.js, featuring secure authentication, dynamic product management, and optimized performance.

Education

Graduate School of Statistical Research

2023- present

Computer Science Diploma

Bachelor of Science in Financial Accounting. Grade: Good
Cairo University

Technical Skills

Frontend:

HTML & CSS
jQuery
Responsive Web Design
React JS

ES Next
TypeScript
Bootstrap & Tailwind CSS

Backend:

C++
Node.js
REST APIs
Python

Object-Oriented Programming (OOP)
Firebase (Firestore, Authentication)
Postman

Flutter(mobile):

State Management (Bloc, Cubit)
Navigation
Handling application flow.

Git & Version Control: GitHub

Architecture: Clean Architecture, SOLID principles.

Programming Languages:

Dart
JavaScript
TypeScript

Python (self-Study)
C, C++ (self-Study)

Courses:

Meta Front-End Developer

[Link](#)

Course Certification Completed:

Introduction to Front-End Development
Version Control
React Basics
Principles of UX/UI Design
Coding Interview Preparation

Programming with JavaScript
HTML and CSS in depth
Advanced React
Front-End Developer Capstone

Project:

Booking a table on the Little Lemon website
User Interface and User Experience Booking table
Bookstore
